Subject Index

A. Kölliker; Classification of tissues; Enamel; History of enamel 44, 133

Adhesion; Bonding; Post-core; Fiber reinforced post; Composite core 44, 22

All-ceramic restoration; Zirconia; Alumina; Core material; Mechanical properties 44, 3

Alumina; Zirconia; All-ceramic restoration; Core material; Mechanical properties 44, 3

Amygdala; Chemotopy; Reward system; β -Endorphin; Dopamine; Orexin; Conditioned taste aversion 44, 91

Anti-aging; Muscle; Mechanical stress; Growth factor; Myosin heavy chain 44, 66

Apoptosis; Hydrogen sulfide; Cancer; Methyl mercaptan; Halitosis 44, 100

Articular chondrocyte; Temporomandibular joint-osteoarthritis (TMJ-OA); Condylar resorption; Extracellular matrix metalloproteinase; Mechanical stimuli 44, 38

Atheromatous plaque; *Streptococcus mutans*; Serotype; Bacteremia; Infective endocarditis; Heart valve 44, 29

Bacteremia; *Streptococcus mutans*; Serotype; Infective endocarditis; Heart valve; Atheromatous plaque 44, 29

Bioengineered tooth; Dental regenerative therapy; Stem cells; Cell aggregate method; Tooth germ 44, 70

BMP; Osteoblast; Notch; CCN3/NOV 44, 48

BMP-2; Periodontal ligament; Gene expression profile; PLAP-1; Mineralization 44, 137

Bonding; Adhesion; Post-core; Fiber reinforced post; Composite core 44, 22

Bone; Wnt; LRP; Osteoblasts; Osteoclasts; β -catenin 44, 76

Cancer; Hydrogen sulfide; Methyl mercaptan; Apoptosis; Halitosis 44, 100

β -catenin; Wnt; LRP; Osteoblasts; Osteoclasts; Bone 44, 76

Carcinogenesis; Cyclooxygenase (COX)-2; Oral cancer; Malignant phenotype; Therapeutic target 44, 57

CCN3/NOV; Osteoblast; BMP; Notch 44, 48

Cell aggregate method; Dental regenerative therapy; Stem cells; Bioengineered tooth; Tooth germ 44, 70

Chemotopy; Amygdala; Reward system; β -Endorphin; Dopamine; Orexin; Conditioned taste aversion 44, 91

Classification of tissues; A. Kölliker; Enamel; History of enamel 44, 133

Composite core; Adhesion; Bonding; Post-core; Fiber reinforced post 44, 22

Conditioned taste aversion; Chemotopy; Amygdala; Reward system; β -Endorphin; Dopamine; Orexin 44, 91

Condylar resorption; Temporomandibular joint-osteoarthritis (TMJ-OA); Articular chondrocyte; Extracellular matrix metalloproteinase; Mechanical stimuli 44, 38

Core material; Zirconia; Alumina; All-ceramic restoration; Mechanical properties 44, 3

Cost-effective; Healthcare reform; Germany; Japan; Prevention-oriented; Treatment-oriented; Dental health policy 44, 109

Cyclooxygenase (COX)-2; Oral cancer; Carcinogenesis; Malignant phenotype; Therapeutic target 44, 57

Dental health policy; Healthcare reform; Germany; Japan; Cost-effective; Prevention-oriented; Treatment-oriented 44, 109

Dental regenerative therapy; Stem cells; Bioengineered tooth; Cell aggregate method; Tooth germ 44, 70

Dentistry; Down syndrome; Early-onset periodontitis; Dscam 44, 118

Dopamine; Chemotopy; Amygdala; Reward system; β -Endorphin; Orexin; Conditioned taste aversion 44, 91

Down syndrome; Early-onset periodontitis; Dentistry; Dscam 44, 118

Dscam; Down syndrome; Early-onset periodontitis; Dentistry 44, 118

- Early-onset periodontitis**; Down syndrome; Dentistry; Dscam **44**, 118
- β -Endorphin**; Chemotopy; Amygdala; Reward system; Dopamine; Orexin; Conditioned taste aversion **44**, 91
- Enamel**; A. Kölliker; Classification of tissues; History of enamel **44**, 133
- Extracellular matrix metalloproteinase**; Temporomandibular joint-osteoarthritis (TMJ-OA); Articular chondrocyte; Condylar resorption; Mechanical stimuli **44**, 38
- Fiber reinforced post**; Adhesion; Bonding; Post-core; Composite core **44**, 22
- Gene expression profile**; Periodontal ligament; PLAP-1; Mineralization; BMP-2 **44**, 137
- Germany**; Healthcare reform; Japan; Cost-effective; Prevention-oriented; Treatment-oriented; Dental health policy **44**, 109
- Growth factor**; Anti-aging; Muscle; Mechanical stress; Myosin heavy chain **44**, 66
- Halitosis**; Hydrogen sulfide; Cancer; Methyl mercaptan; Apoptosis **44**, 100
- Healthcare reform**; Germany; Japan; Cost-effective; Prevention-oriented; Treatment-oriented; Dental health policy **44**, 109
- Heart valve**; *Streptococcus mutans*; Serotype; Bacteremia; Infective endocarditis; Atheromatous plaque **44**, 29
- History of enamel**; A. Kölliker; Classification of tissues; Enamel **44**, 133
- Hydrogen sulfide**; Cancer; Methyl mercaptan; Apoptosis; Halitosis **44**, 100
- Infective endocarditis**; *Streptococcus mutans*; Serotype; Bacteremia; Heart valve; Atheromatous plaque **44**, 29
- Japan**; Healthcare reform; Germany; Cost-effective; Prevention-oriented; Treatment-oriented; Dental health policy **44**, 109
- LRP**; Wnt; Osteoblasts; Osteoclasts; β -catenin; Bone **44**, 76
- Malignant phenotype**; Cyclooxygenase (COX)-2; Oral cancer; Carcinogenesis; Therapeutic target **44**, 57
- Masticatory function**; Soft denture liner; Viscoelasticity; Reline **44**, 128
- Mechanical properties**; Zirconia; Alumina; All-ceramic restoration; Core material **44**, 3
- Mechanical stimuli**; Temporomandibular joint-osteoarthritis (TMJ-OA); Articular chondrocyte; Condylar resorption; Extracellular matrix metalloproteinase **44**, 38
- Mechanical stress**; Anti-aging; Muscle; Growth factor; Myosin heavy chain **44**, 66
- Methyl mercaptan**; Hydrogen sulfide; Cancer; Apoptosis; Halitosis **44**, 100
- Mineralization**; Periodontal ligament; Gene expression profile; PLAP-1; BMP-2 **44**, 137
- MR image**; Osteoarthritis; Temporomandibular joint (TMJ); Symptom **44**, 83
- Muscle**; Anti-aging; Mechanical stress; Growth factor; Myosin heavy chain **44**, 66
- Myosin heavy chain**; Anti-aging; Muscle; Mechanical stress; Growth factor **44**, 66
- Notch**; Osteoblast; BMP; CCN3/NOV **44**, 48
- Oral cancer**; Cyclooxygenase (COX)-2; Carcinogenesis; Malignant phenotype; Therapeutic target **44**, 57
- Orexin**; Chemotopy; Amygdala; Reward system; β -Endorphin; Dopamine; Conditioned taste aversion **44**, 91
- Osteoarthritis**; MR image; Temporomandibular joint (TMJ); Symptom **44**, 83
- Osteoblast**; BMP; Notch; CCN3/NOV **44**, 48
- Osteoblasts**; Wnt; LRP; Osteoclasts; β -catenin; Bone **44**, 76
- Osteoclasts**; Wnt; LRP; Osteoblasts; β -catenin; Bone **44**, 76
- Oxidative stresses**; Reactive oxygen species; Temporomandibular joint; Temporomandibular joint disorders **44**, 145
- Periodontal ligament**; Gene expression profile; PLAP-1; Mineralization; BMP-2 **44**, 137
- PLAP-1**; Periodontal ligament; Gene expression profile; Mineralization; BMP-2 **44**, 137
- Post-core**; Adhesion; Bonding; Fiber reinforced post; Composite core **44**, 22
- Prevention-oriented**; Healthcare reform; Germany; Japan; Cost-effective; Treatment-oriented; Dental health policy **44**, 109
- Reactive oxygen species**; Oxidative stresses; Temporomandibular joint; Temporomandibular joint disorders **44**, 145
- Reline**; Soft denture liner; Viscoelasticity; Masticatory function **44**, 128
- Reward system**; Chemotopy; Amygdala; β -Endorphin; Dopamine; Orexin; Conditioned taste aversion **44**, 91
- Serotype**; *Streptococcus mutans*; Bacteremia; Infective endocarditis; Heart valve; Atheromatous plaque **44**, 29
- Soft denture liner**; Viscoelasticity; Masticatory function; Reline **44**, 128
- Stem cells**; Dental regenerative therapy; Bioengineered tooth; Cell aggregate method; Tooth germ **44**, 70
- Streptococcus mutans***; Serotype; Bacteremia; Infective endocarditis; Heart valve; Atheromatous plaque **44**, 29
- Symptom**; Osteoarthritis; MR image; Temporomandibular joint (TMJ) **44**, 83
- Temporomandibular joint disorders**; Reactive oxygen species; Oxidative stresses; Temporomandibular joint **44**, 145
- Temporomandibular joint**; Reactive oxygen species; Oxidative stresses; Temporomandibular joint disorders **44**, 145

Temporomandibular joint (TMJ); Osteoarthritis; MR image; Symptom **44**, 83

Temporomandibular joint-osteoarthritis (TMJ-OA); Articular chondrocyte; Condylar resorption; Extracellular matrix metallo-proteinase; Mechanical stimuli **44**, 38

Therapeutic target; Cyclooxygenase (COX)-2; Oral cancer; Carcinogenesis; Malignant phenotype **44**, 57

Tooth germ; Dental regenerative therapy; Stem cells; Bioengineered tooth; Cell aggregate method **44**, 70

Treatment-oriented; Healthcare reform; Germany; Japan; Cost-effective; Prevention-oriented; Dental health policy **44**, 109

Viscoelasticity; Soft denture liner; Masticatory function; Reline **44**, 128

Wnt; LRP; Osteoblasts; Osteoclasts; β -catenin; Bone **44**, 76

Zirconia; Alumina; All-ceramic restoration; Core material; Mechanical properties **44**, 3
